The BPEATS-MUSIC Germany Media Pool: professional access to the sound

*A protected destination for radio, DJs, media and selected industry
partners-direct, premium and clearly structured.*

ARTICLE

The BPEATS-MUSIC Germany Media Pool connects professional partners directly with the label's current repertoire. Approved radio stations, DJs, media editors and selected industry contacts receive access to full-length audio files, relevant release information and a clearly structured catalogue.

Access is intentionally private. This keeps master files protected, usage paths traceable and releases available within a professional environment. Public visitors hear curated previews; authorised partners receive the full-length access required for airplay, DJ sets, editorial work and professional presentation.

Every artist retains a distinct identity. BassTianic BPM, Daddy Mike, Basti & Mike and NOCTIS are not presented as anonymous files, but as clearly directed artist worlds with artwork, metadata, release structure and precise attribution.

The Media Pool represents a modern approach to music distribution: fast, personal and controlled-from the label directly to the people who use and amplify music professionally.

Professional access. Protected masters. Clear release paths.
